

# Bund Lining: Two-part epoxy resin

This project involved the refurbishment of an existing bund near Reading, Berkshire. The bund itself was designed to contain the release of chemicals from an outdoor processing facility that manufactured. An two-part epoxy resin was applied to the bund wall, following an inspection. Strandek undertook the removal of the existing bund lining, prior to applying an epoxy primer followed by two layers of epoxy resin to the base of the bund and the bund wall. The result was a durable and robust lining compliant with [HSE regulations on secondary containment spill bunds](#).

## Performance

See more at <https://www.strandek.co.uk/services/industrial-lining-coating/bund-linings-coating/>

“Epoxy resin bund lining systems are ideal for many applications. They provide excellent chemical resistance, durability and a very strong substrate bond.”

Steve Bowen®, Managing Director, Strandek GRP Systems

## About Strandek

Established in 1976, Strandek specialise in a range of waterproofing solutions. Working with a range of customers, they offer exceptional performance and a high-quality of workmanship.
