

# Flat Roof Repair

- Image depicts a flat roof that has been repaired by Strandek.
- This was for a domestic property in Newport, South Wales. The procedure required timber formwork construction to the adjacent areas which was then over laminated in standard Built GRP fibreglass laminate. This was cold applied in-situ.
- A very high standard of workmanship was required to complete each unit thereby ensuring 100% water tightness and no ingress to internal structures.
- Completed installation resulted in our client confirming their absolute satisfaction with the performance and high standards demonstrated by Strandek throughout the contract.
