

## New Bund Lining

Following construction of a new MRI unit in a London based NHS hospital, Strandek were engaged to install a new water storage tank bund lining located above the unit to provide protection from possible tank failure.

*Location: NHS hospital, London.*

### Performance

See more at <https://www.strandek.co.uk/services/industrial-lining-coating/bund-linings-coating/>

We've been providing commercial, industrial and domestic customers high quality waterproofing systems since 1976. This is one of over 5,000 projects that we've successfully completed.

Steve Bowen®, Managing Director, Strandek GRP Systems

### About Strandek

Established in 1976, Strandek specialise in a range of waterproofing solutions. Working with a range of customers, they offer exceptional performance and a high-quality of workmanship.

# New Bund Lining

The bund base was formed in concrete and then over-decked in plywood with a 300 mm upstand to the perimeter. The bund lining comprised a coating of G4 Primer followed by a 600gram per square meter fibreglass laminate completed in a light grey flow coat finish resulting in a fully waterproof hard wearing membrane. Pre-formed GRP moulded sections were integrated with the upstand to form a horizontal plinth to the perimeter ready to accept metal framework. The laminate was additionally formed into the drainage gully and around a vent pipe. The resulting finish is now ready to accept the tank storage facility together with all ancillary equipment.
